This study explores the Japanese motivations in raising the proposal for racial equality at the 1919 Paris Peace Conference. This is the first comprehensive analysis of an historically significant event which has not been given adequate scholarly attention in the past. The story which unfolds underlines the complexity of politics and diplomacy surrounding the racial equality proposal and analyses the effect of the failure of the proposal on Japan's politics in the 1920s and 1930s.

Celebrated as the builder of the Eddystone Lighthouse near Plymouth, John Smeaton (1724-92) made major contributions to civil engineering. Posthumously published between 1812 and 1814, this four-volume illustrated set contains Smeaton's complete reports on the various engineering works he constructed during his career, and his technical papers.

balanced, and thoroughly modern approach to U.S. History, LIBERTY, EQUALITY, POWER uses these three themes in a unique approach to show how the United States was transformed, in a relatively short time, from a land inhabited by hunter-gatherer and agricultural Native American societies into the most powerful industrial nation on earth. This approach helps students understand not only the impact of the notions of liberty and equality, which are often associated with the American story, but also how dominant and subordinate groups have affected and been affected by the ever-shifting balance of power. The text integrates the best of recent social and cultural scholarship into a political story, offering students a comprehensive and complete understanding of American history. The term "conjugal rights" has long characterized ways of speaking about marriage both in the canonistic tradition and in the secular legal systems of the West. This book explores the origins and dimensions of this concept and the range of meanings that have attached to it from the twelfth century to the present. Employing far-ranging sources, Charles Reid Jr. examines the language of marriage in classical Roman law, the Germanic legal codes of early medieval Europe, and the writings of canon

lawyers and theologians from the medieval and early modern periods. The heart of the book, however, consists of the writings of the canonists of the High Middle Ages, especially the works of Hostiensis, Bernard of Parma, Innocent IV, and Raymond de Peafort. Reid's incisive survey provides a new understanding of subjects such as the right of parties to marry free of parental coercion, the nature of "paternal power," the place of bodies in the marriage contract, the meaning and implications of gender equality, and the right of inheritance.

Community care lies at the intersection of day-to-day life and the public world of service provision. Using the lens of one particular activity - bathing - this book explores what happens when the public world of professionals and service provision enters the lives of older and disabled people. In doing so it addresses wider issues concerning the management of the body, the meaning of carework and the significance of body

The relationship between religion and human rights is both complex and inextricable. While most of the world's religions have supported violence, repression, and prejudice, each has also played a crucial role in the modern struggle for universal human rights. Most importantly, religions provide the essential sources

and scales of dignity and responsibility, shame and respect, restraint and regret, restitution and reconciliation that a human rights regime needs to survive and flourish in any culture. This volume provides authoritative examinations of the contributions to human rights of Judaism, Christianity, Islam, Hinduism, Confucianism, Buddhism, and indigenous religions. Each chapter grapples with the concept and origins of "human rights," and offers insight into the major human rights issues that confront religious individuals and communities. These include core issues of freedom of religious conscience, choice, exercise, expression, association, morality, and self-determination. They also include analysis of the roles of religious ideas and institutions in the cultivation and abridgement of rights of women, children, and minorities, and rights to peace, orderly development, and protection of nature and the environment. With contributions by a score of leading experts, *Religion and Human Rights* provides authoritative and accessible assessments of the contributions of Judaism, Christianity, Islam, Hinduism, Confucianism, Buddhism, and Indigenous religions to the development of the ideas and institutions of human rights. It also probes the major human rights issues that confront religious individuals and communities around the world today, and the main challenges that the world's religions will pose to the human rights regime in the future.

Medieval Europe provides a comprehensive overview of the gender rules encountered in Europe in the period between approximately 500 and 1500 C.E. The essays collected in this volume speak to interpretative challenges common to all fields of women's and gender history - that is, how best to uncover the experiences of ordinary people from archives formed mainly by and about elite males, and how to combine social histories of lived experiences with cultural histories of gendered discourses and identities. The collection focuses on Western Europe in the Middle Ages but offers some consideration of medieval Islam and Byzantium. The Handbook is structured into seven sections: Christian, Jewish, and Muslim thought; law in theory and practice; domestic life and material culture; labour, land, and economy; bodies and sexualities; gender and holiness; and the interplay of continuity and change throughout the medieval period. It contains material from some of the foremost scholars in this field, and it not only serves as the major reference text in medieval and gender studies, but also provides an agenda for future new research.

Equality 7-2521 finds himself out of step with the collectivist society of the future, and discovers a means to freedom in Ayn Rand's fable of the individual in conflict with society. First published in 1938, Anthem takes place in a dystopian future world in which humanity is enduring a new dark age, human life is regimented in every respect and personal identity has been all but snuffed out by a totalitarian government. The narrator, writing his story in secret, realizes he is a criminal simply for having thoughts of his own. Exploring the ruins of a previous civilization he discovers relics, conducts forbidden experiments and learns enough to question the very structure of his society. Can he share this knowledge with his fellow citizens? The author strips the relationship of humanity to civilization down to its bare essence in this modern parable that starkly illuminates the challenge an oppressive government presents to individuality. With an eye-catching new cover, and professionally typeset manuscript, this edition of Anthem is both modern and readable.

This original and compelling book argues that previous studies of John Stuart Mill's work have neglected his egalitarianism and thus seriously misunderstood his views. Morales demonstrates that Mill was fundamentally concerned with how the exercise of unjust or arbitrary power by some individuals over others sabotages the possibility of human well-being and social improvement. Mill therefore believed that 'perfect equality'--more than liberty--was the foundation of democracy and that democracy was a moral ideal for the organization of human life in all of its dimensions. By reinterpreting Mill, Morales also challenges twentieth-century views of liberalism, and addresses its contemporary communitarian and feminist critics.

The Disability Discrimination Bill (Cm. 6058-I/II/III, ISBN 010160582X published in December 2003) extends the Disability Discrimination Act 1995 to cover the functions of public bodies, imposing a positive duty to eliminate discrimination and harassment and to promote equality of opportunity for disabled people. This consultation paper seeks views on proposals for the guidance the Disability Rights Commission should issue to support the implementation of these changes, and on the possible use of regulatory powers. Issues discussed include: changing working cultures, the specific duties and range of public bodies covered, guidance to be issued to smaller bodies, content of guidance relating to procurement, how public authorities can promote equality in practice, gathering evidence and reporting progress, implementation of new duties, and costs and benefits of the proposals. Responses to the consultation should be received by 21 October 2004 and sent to: Sue Hammond, Disability Discrimination Bill Division, 6th floor, The Adelphi, London WC2N 6HT or emailed to: [Consultation-disability@dwp.gsi.gov.uk](mailto:Consultation-disability@dwp.gsi.gov.uk)

Through his research on the status of women in Florence and other Italian cities, Julius Kirshner helped to establish the socio-legal history of women in late medieval and Renaissance Italy and challenge the idea that Florentine women had an inferior legal position and civic status. In *Marriage, Dowry, and Citizenship in Late Medieval and Renaissance Italy*, Kirshner collects nine important essays which address these issues in Florence and the cities of northern and central Italy. Using a cross-disciplinary approach that draws on the methodologies of both social and legal history, the essays in this collection present a wealth of examples of daughters, wives, and widows acting as full-fledged social and legal actors. Revised and updated to reflect current scholarship, the essays in *Marriage, Dowry, and Citizenship in Late Medieval and Renaissance Italy* appear alongside an extended introduction which situates them within the broader field of Renaissance legal history.

Price and Shildrick bring together over 40 important feminist thinkers to discuss key arguments and issues concerning the body. It includes articles on race, cyberspace, theatre, classics, transsexuality, reproductive technologies, illness, rape, plastic surgery, and disabilities. The articles cover many different areas with a stress on the interdisciplinary links of contemporary feminist thought with philosophy, cultural studies, sociology and queer studies. What unites the various approaches represented is the understanding of the body as a site of contestation, the place where feminism can engage directly with the devaluation of women and move on to mobilize strategies of resistance.

Sovereignty was a key issue in the baroque, and especially in the Dutch Republic with its incredibly complicated political organisation. Consequently, sovereignty was explored in and through Joost van den Vondel's theatre plays. Vondel sensed a fundamental problem in the construction of Europe's

politico-cultural 'House'. The questions he asked with respect to that construction concerned the relationship between theology and politics, including in terms of gender and culture. Because these questions could barely be considered explicitly, let alone actually discussed, they had to be presented through literature theatre. A close reading of a number of plays reveals not only a pivotal discussion that concerns Vondel'S own times, but also an on-going struggle in the European exploration of sovereignty. In that context, power and potency a distinction made by Spinoza determine the status of sovereignty that any body can acquire.
