Office for Budget Responsibility: Economic and Fiscal Outlook - Cm. 8748

Reports on the state of the Federal budget and the United States economy. Each January, the Congressional Budget (CBO) prepares "baseline" Federal budget projections and the outlook for the United States economy spanning the next 10 years. Those projections are not a forecast of future events; rather, they are intended to provide a benchmark against which potential policy changes can be measured. Therefore, as specified in law, those projections generally incorporate the assumption that current laws are implemented. But substantial changes to tax and spending policies are slated to take effect in calendar year 2013 under current

law. So CBO has also prepared projections under an "alternative fiscal scenario," in which some current or recent policies are assumed to continue in effect, even though, by law, they are scheduled to change. The decisions made by lawmakers as they confront those policy choices will have a significant impact on budget outcomes in the coming years.

The Office for Budget Responsibility reports that the UK economy has picked up more strongly in 2013 than expected in its March forecast. Private consumption and housing investment have grown whilst business investment and net trade continue to disappoint. The forecast for GDP growth in 2013 is revised up to 1.4 per cent, but this is not expected to be maintained in 2014 as productivity and real earnings growth remain weak. The positive growth is judged to be cyclical, reducing the amount of spare capacity in the economy, rather than indicating stronger underlying growth potential. Productivity-driven growth in real earnings is necessary to sustain the recovery and the outlook for productivity growth is the key uncertainty. Nevertheless, the forecast for growth in 2014 is now 2.4 per cent. Public sector net borrowing (PSNB) - the gap between what the Government spends and raises in revenue - is forecast to be £111.2 billion this year, £8.6 billion lower than the March forecast and £3.8 billion lower than in 2012-13. Underlying PSNB is estimated to have fallen by a third between 2009-10 and 2012-13, the pace of reduction slowing in 2012-13. The employment forecast is now expected to reach 31.2 million in 2018, with unemployment falling steadily over the coming years, reaching 7 per cent in mid-2015 and 6 per cent by the end of 2017. CPI inflation is forecast to fall back to the Bank of England's 2 per cent target during 2016 whilst house price inflation is revised upwards, expected to be above 5 per cent in 2014 and 7 per cent in 2015.

Despite the improvement in the public finances, this year's Autumn statement is fiscally neutral and locks in lower spending by reducing departmental budgets for 2014-15 and 2015-16 by 1.1% but excluding local government, Security & Intelligence Agencies and HMRC. The Government will: cap the Retail Prices Index in business rates to 2% in 2014-15 and extend the doubling of Small Business Rate Relief to April 2014; will provide a business rate discount of £1,000 in 2014-15 and 2014-16 for retail properties with a rateable value of up to £50,000 and a 50%

discount from business rates for new occupants of previously empty retail premises for 18 months; abolish National Insurance Contributions for under 21 year olds on earnings up to £813 per week; remove cap on higher education student numbers; announce further reforms to make the most of the UK's science base; introduce a new tax relief for shale gas, and increase support for employee ownership and the creative industries; improve the UK's infrastructure with the National Infrastructure Plan 2013; and take further action to increase housing supply and support home ownership. Fuel prices will be frozen and the impact of policies on energy bills will be reduced. The average increase in rail fares will be capped. Married couples & civil partners will be allowed to transfer £1,000 of their income tax personal allowance to their spouse where neither is a higher rate taxpayer.

Research Paper (undergraduate) from the year 2015 in the subject Instructor Plans: Computing / Data Processing / IT / Telecommunication, grade: 1,0, University of Applied Sciences Technikum Vienna (Telekommunikation und Internettechnologien), course: Advanced Technologies, language: English, abstract: The information and communications sector is experiencing a major transformation leading to a quick emerging novel industry landscape. The well-known business model of telecommunication operators is continuously being affected by the intensifying struggle between operators. These aspects do not only involve an increasing saturation within the communications market, but also contributes to a rising substitution behavior triggered by well-established Internet businesses. In this context, the Ovum Global Telecoms Market Outlook 2013-2018 predicts for the coming five years a global increase of mobile lines of about 25% (e.g. 8.1 billion in total by 2018, the relevant growth coming primarily from emerging economies). However, the outlook for the fixed-network market does not look that promising: a 5% reduction in voice revenues for the period 2012 - 2018 is expected. Other important features that influence the economic achievement of a telecommunications provider are represented by the current regulatory provisions along with the price level the provider can realize. Obviously, this price level generally mirrors the customer behavior and the development (stage) of a particular market. In this sense, the mobile industry has certainly the potential to set free even superior benefits and contribute to meets the EU sustainability and innovation targets defined in the EU 2020 strategy [14]. In fact, the European

mobile industry is no longer restricted to the provision of basic voice and data services, but is rather taking to an active role in offering high-speed broadband access and (data) connectivity. This involves a new third wave of connectivity (e.g. beyond tablets and laptops), comprising cars and buildings and having undoubtedly the prospect of connecting almost anything and anyone (the “Connected Life” as the GSMA denotes it).

The second edition of Sustainable Business prepares future business leaders to tackle the most crucial social and environmental issues of our time. This engaging textbook provides students with a comprehensive, balanced introduction to integrating sustainable business policies into all core business functions and processes. The text employs a qualitative-based learning process to help students understand how leadership, finance, accounting, risk management, marketing, supply chain management, and operations can be adapted to meet the sustainability goals of the 21st century. Looking at sustainable business from the managerial viewpoint, the fully-updated new edition explains how and why business is evolving due to increased consumer and regulatory pressure for sustainable performance. Business topics are first introduced in the same manner as traditional MBA programs, and then examined through the lens of sustainability. The text incorporates real-life examples of social and environmental leadership to demonstrate the efficacy of good sustainable business decisions, and illustrates

Lutheran tradition has in various ways influenced attitudes to work, the economy, the state, education, and health care. One reason that Lutheran theology has been interpreted in various ways is that it is always influenced by surrounding social and cultural contexts. In a society where the church has lost a great deal of its cultural impact and authority, and where there is a plurality of religious convictions, the question of Lutheran identity has never been more urgent. However, this question is also raised in the Global South where Lutheran churches need to find their identity in a relationship with several other religions. Here this relationship is developed from a minority perspective. Is it possible to develop a Lutheran political theology that gives adequate contributions to issues concerning social and economic justice? What is the role of women in church and society around the

world? Is it possible to interpret Lutheran theology in such a way that it includes liberating perspectives? These are some of the questions and issues discussed in this book.

Qatar and the Arab Spring

This book looks at pension reform, the role of private pensions and retirement savings. Population ageing and longevity risk is examined as are the means of increasing coverage and providing automatic enrolment.

Minerals Yearbook - Area Reports: International Review

Qatar and the Arab Spring offers a frank examination of Qatar's startling rise to regional and international prominence, describing how its distinctive policy stance toward the Arab Spring emerged. In only a decade, Qatari policy-makers - led by the Emir, Sheikh Hamad bin Khalifa Al-Thani, and his prime minister Sheikh Hamad bin Jassim Al-Thani - catapulted Qatar from a sleepy backwater to a regional power with truly international reach. In addition to pursuing an aggressive state-branding strategy with its successful bid for the 2022 FIFA World Cup, Qatar forged a reputation for diplomatic mediation that combined intensely personalized engagement with financial backing and favorable media coverage through the Al-

Jazeera. These factors converged in early 2011 with the outbreak of the Arab Spring revolts in North Africa, Syria, and Yemen, which Qatari leaders saw as an opportunity to seal their regional and international influence, rather than as a challenge to their authority, and this guided their support of the rebellions against the Gaddafi and Assad regimes in Libya and Syria. From the high watermark of Qatari influence after the toppling of Gaddafi in 2011, that rapidly gave way to policy overreach in Syria in 2012, Coates Ulrichsen analyses Qatari ambition and capabilities as the tiny emirate sought to shape the transitions in the Arab world.
